*Boston Builders'
Hardware Co.*

*20 Sudbury St.
Boston Mass.*

TERMS — 2% Cash — Except where rating is satisfactory and credit established.

CREDITS — Individuals or Firms financially responsible or those having satisfactory rating with the Commercial Agencies will be sold on open account on 30 days net or 2% — 10 days.

C. O. D. — Shipments will be made only where order is accompanied with check or money order for at least 50% of purchase.

SHIPPING INSTRUCTIONS — Shipment will be made by freight, express or parcel post at customer's option. Where no instructions to the contrary are given, orders will be forwarded by freight, except where light weight, excessive value or haste make it more practicable in our judgment to forward by express or parcel post. Charges prepaid on orders of \$35.00 or more.

PARCEL POST — Shipments are always sent insured unless otherwise specified. Please include parcel post charges.

CLAIMS — Claims for shortage must be made within five days from date of invoice, and unless so made cannot be considered, except in cases where shortage is confirmed by our records. Where we hold Transportation Company's receipt in detail for shipment, claim for shortage must be made to Transportation Company. All claims for breakage, damage or loss in transit, must be made to Transportation Company.

RETURNED GOODS — No credit will be allowed for goods returned without permission. Request for permission to return merchandise should be accompanied by date of invoice on which goods were purchased, together with reason for return.

When in Boston we would appreciate you calling on us, where we can show you our complete stock of Builders Hardware and Tools. If convenient send us your orders which will have our prompt attention. A trial order will convince you.

POLICY — Your money back if our merchandise is not satisfactory. Over 30 years of Honest and Satisfactory dealings.

WIN-DOR CASEMENT HARDWARE

For Outswing Casements

Screen need not be moved. The WIN-DOR operator opens and closes the casement without the need of opening or closing the screen. A quick easy swing brings the window to the desired position from full open to tight shut. Operates on either wood or metal casements without special fittings.

7—Steel

7B—Brass

FINISHES: Dull and Polished Brass

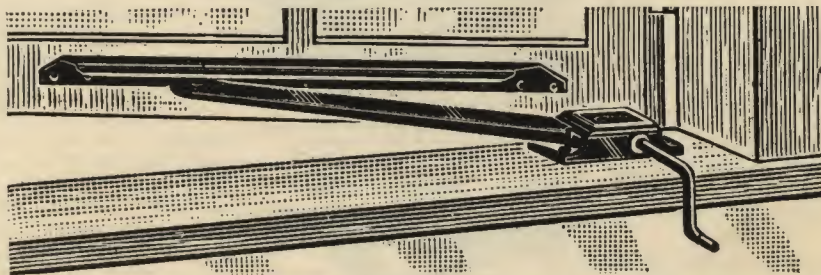

Wrought Bronze

Send for circulars

WIN-DOR CASEMENT HARDWARE

25—Steel

25B—Brass

A worm gear operator having architectural beauty, quicker, easier operation, rustless, everlasting bearings, and improvements in every other detail of design.

Detachable handles.

Solid bronze or brass.

FINISHES: Dull Brass, Polished Brass and Antique Copper.

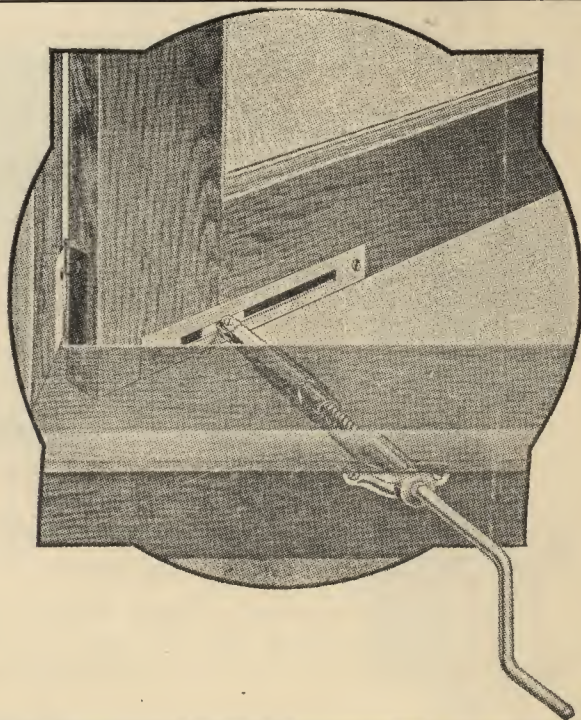

Send for circulars.

LOXRITE CASEMENT ADJUSTER

Can be installed before or after completion of building. Just one hole is necessary through the sill. Does not interfere with screens. Substantially built from solid brass. Has smooth and positive action, easy of operation, sealing the window and making it air tight.

FINISHES: Dull Brass and Polished Brass.

Send for circular.

STATE FINISHES AND SIZES DESIRED WHEN ORDERING.

"The Easy Hardware"

FOR CASEMENTS AND TRANSOMS

Whitco-equipped casements insure perfect ventilation whichever way the wind blows.

Whitco is a simple, self-contained unit that takes the place of both butts and adjusters for swinging and controlling casements and transoms.

This hardware is easily and quickly applied to single sash, pairs of sash or to multiple sash in wide openings without mullions. It may be used on old or new sash.

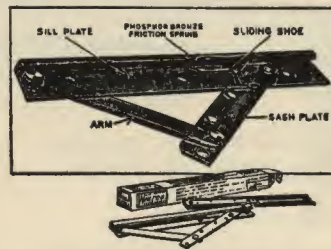

Whitco makes such effective use of the principles of leverage and friction that it not only insures a perfectly operating sash at all times, but it holds the sash in any position, in any wind, without rattle.

A set—the equipment for one casement or transom—consists of two pieces, one for the top and one for the bottom of a sash, or one for each side of a transom. These pieces are identical, except one is the reverse of the other.

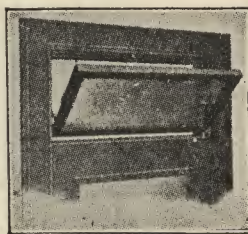

There are no lefts or rights. Whether the sash is to swing to the left or the right determines which piece goes at the top and which piece goes at the bottom.

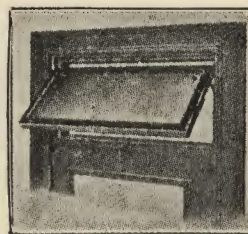

Whitco makes it easy and safe to clean outside of casement from within the room.

Advertised List Prices
In Solid Brass Per set
In Rust-proofed Steel Per set

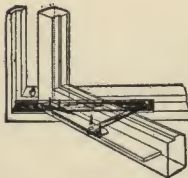

Whitco-equipped transom swinging in from top.

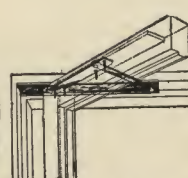

Whitco-equipped transom swinging either in or out from bottom.

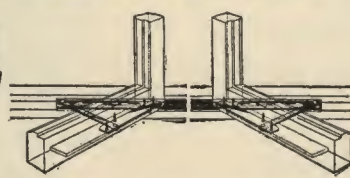

Ventilation both above and below transom.

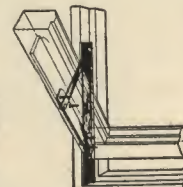

Whitco applied at bottom of casement swinging out.

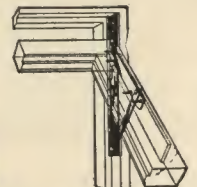

Whitco applied at top of casement swinging out.

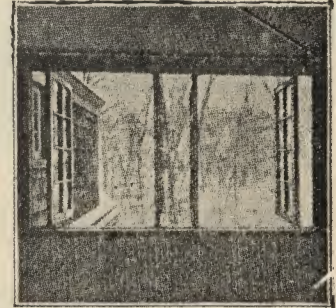

Whitco applied at bottom of adjoining pair of multiple sash.

Whitco at left end of transom swinging in from top.

Whitco at right end of transom swinging in from bottom.

Any number of sash may be installed in a wide opening without mullions.

The labor cost of installing Whitco is materially less than that of a set of butts and any other type of adjuster on the market.

No special sash or frame detail is required. The only fitting needed is a small housing at top and bottom of each sash, which the carpenter can make with a chisel. Otherwise a screw-driver is the only tool he uses in making an installation. No special hardware finishes need be considered. When installed Whitco is entirely concealed.

One size fits all casements up to 30 inches in width, or all transoms up to 20 inches in height. For transoms over 20 inches high Whitco may be obtained in special sizes. Prices on request.

The only specification the dealer needs is the number of sash in a job.

Whitco is made in solid brass and in rust-proofed steel.

Each set, with 14 screws and installing instructions, is packed in a neat carton 1" x 1" x 8" shipping weight 1 pound.

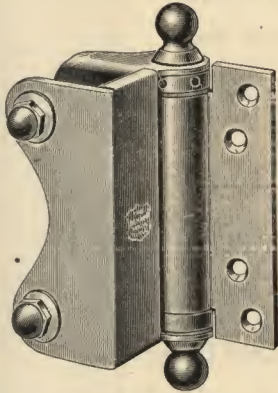

Standard packages, 50 sets, shipping weight 50 pounds.

EXTRA HEAVY TOP AND BOTTOM BOLT No. 1052

Wrought Steel

For Garages, etc.

Can be used on doors opening in or out, made in standard size for doors 8' high with 6" adjusters by $\frac{1}{4}$ " intervals. Can be furnished for doors of any height on special orders.

Packed complete one in a box.

GARAGE BOLTS No. 1053

Wrought Steel, Extra Heavy

These bolts are designed for use on Garage and other heavy doors. The drawing feature of this bolt enables it to draw the bolt in snugly. The bolt is of very simple construction which makes it easy to apply. This bolt is made in one size which is suitable for an 8 ft. opening. Near the handle in both sections of the rod there are six holes drilled, each $\frac{7}{16}$ " apart, this enables the bolt to be varied in length up to 6". Length of lever Handle $7\frac{1}{8}$ ". Japanned.

For swinging barrels under counters and shelves.

SAFETY CHIMNEY PLATE

A Safeguard Against Fire

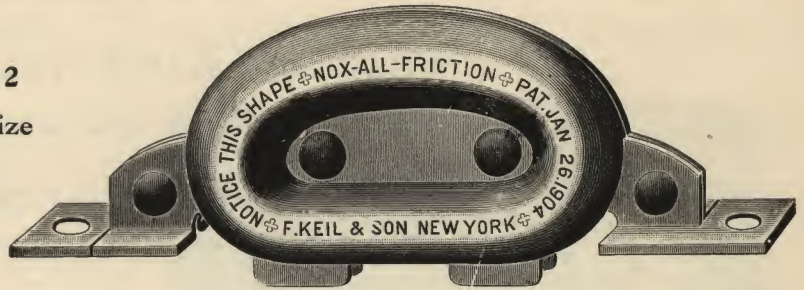

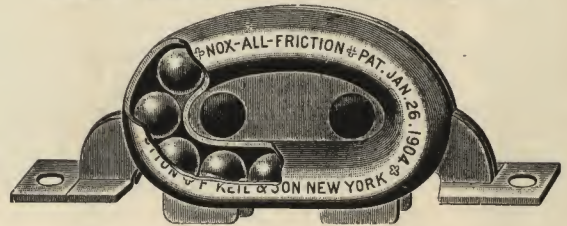

Plaster plate forms a metal casing around the flue and this combined with the air space is a safeguard against fire from overheated stove pipes. It is self-adjustable, allowing for the setting of the walls from 1" to 2". It is economical to install and on account of its merits the building inspectors approve it.

Furnished complete.

STERLING BALANCE FOR WINDOWS

This balance is preferable to cords and weights on account of ease of installation and economy.

There are no rattling windows where the Sterling is used, as the pressure of the springs through the rollers on the sash prevents it.

There is no cutting or marring of the sash by the Sterling as it is let into the jumb of the window frame.

There is no wear on the sash, as nothing but a wooden roller comes in contact with it. There are no cords to wear out or break. With the Sterling the sash can be removed easily for cleaning or glazing; simply remove stops from either side and lift out sashes.

Description: The Sterling window balance consists of a face plate, an inclined plane, a flat two-leaf tempered spring, a hard maple roller and three screw adjustments, each part so fitted to the others that they are held in place by the adjusting screws.

No rivets or bolts are used in putting it together, so that nothing can get out of order or need repairing.

Two sizes of the STERLING, owing to their large range of adjustment, cover all the ordinary weight windows.

For repairing old buildings, the STERLING is invaluable, it being easily applied and the only practical window balance made.

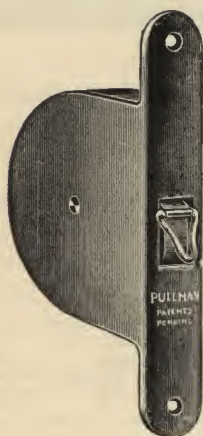

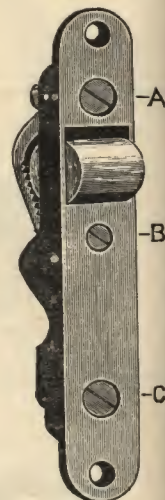

The STERLING can be used in narrow mullions where it is impossible to use weights or other fixtures.

Four balances constitute a set which covers a double window, two balances being required for each sash.

Full directions covering the applying of the balance to new or old windows accompany each set of the balances.

No. 5 covers sash that weighs from six to fourteen pounds each sash. A fourteen-pound sash measures about 28x32.

No. 6 covers sash that weighs from fifteen to twenty-five pounds each sash. A twenty-five pound sash measures approximately 32x40.

SASH BALANCES, PULLMAN

Operated by one cord, locks automatically

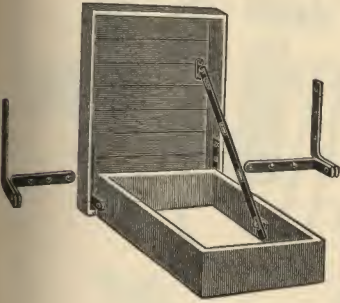

No.	Weight of Each Sash	Length of Tape
1 K	6 to 8 lbs.	46
2 K	8 " 10 "	46
3 K	10 " 12 "	46
4 K	12 " 14 "	46
5 K	14 " 16 "	46
6 K	16 " 18 "	46
7 K	18 " 20 "	46
8 K	20 " 22 "	46
9 K	22 " 24 "	46
10 K	24 " 27 "	46

Do not estimate the weight of sash but weigh each one on scales. There is much variation in the weight of sash of the same dimension. Be sure that sufficient space is left for the balance.

(One set consists of four Balances)

No. 435 "SLIDETITE" GARAGE DOOR HARDWARE

Single Car Garage

Doors so installed fit perfectly tight. Are weather proof and cannot sag. This set permits the use of part of the opening, prevents warping of doors at top. Permits the use of doors that correspond with style of architecture used in residence. Cut shows interior view of the three door "Slidetite" installation for 8 ft. opening. Use three standard 2 ft. x 8 ft. doors. "Slidetite" hardware is not limited to narrow openings. It is furnished in sets for openings ranging from 8 ft. to 30 ft. wide, containing from two to ten doors in the opening. Various loft combinations can also be furnished in addition to those shown.

Floor plans of above set.
Note clear opening between jamb.

R W No. 435x31 6-DOOR SLIDETITE GARAGE EQUIPMENT

Two Car Garage

In this set three of the doors slide and fold toward each jamb. The centre doors are used for entrances. Designed for openings up to 18' wide. The offset hinges used at the jamb will throw two of the doors entirely back of the jamb, thus leaving an unobstructed opening. The A set uses top spring bolts and bottom cane bolts for locking the doors, while the B set includes No. 517 top and bottom cremone bolts.

No. 435 A6 31

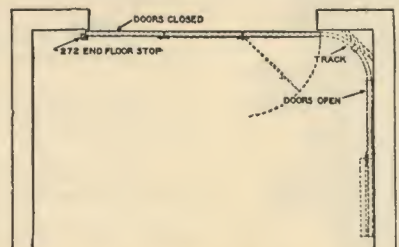

No. 435 B6 31

"SLYDASIDE" No. 235 J J

Garage Door Hardware

Single Car Garage

The doors in this set slide around the corner and lie flat against the side wall. Entrance door at one jamb. Cut shows interior view three door "Slydaside" installation. Standard 2 ft. x 8 ft. doors are used. The above includes all the hardware as shown in illustration and makes a complete installation.

Floor plans for above set.

R W No. 235x31 K K HARDWARE

Two Car Garage

This garage door hardware is made for openings containing six doors, three of which are hinged together and slide to the right and three of which are hinged together and slide to the left. The end doors nearest the side of the building toward which the doors slide in opening, are used as entrance doors. Designed for openings up to 20' wide.

No. 235 K K 11531 for 16' opening

No. 235 K K 11831 for 16-18' opening.

No. 235 K K 12031 for 18-20' opening.

STATE FINISHES AND SIZES DESIRED WHEN ORDERING.

**R-W No. 70 FLUSH PULLS**

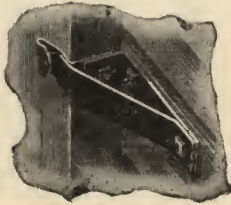

Made in two sizes, No. 1 for doors up to $1\frac{3}{4}$ " thick; No. 2 for doors more than $1\frac{3}{4}$ " thick. Black enamel finish. Packed in bulk.

**R-W No. 470 HEAVY FLUSH PULLS**

For very heavy doors, $1\frac{3}{4}$ " or more in thickness. It is necessary to cut a mortise into the door $1\frac{3}{4}$ " deep in which to set the cup of the pull; $6\frac{1}{2}$ " long overall, $4\frac{3}{4}$ " wide black japan finish. Weight each 3 lbs.

R-W No. 89 DOOR BINDER

Adjustable for doors $1\frac{3}{4}$ " to 3" thick. May be used at front or back of door. Finish black japan. Packed two in metal edge box with screws.

**GARAGE DOOR CASTER**

Extra Heavy.

To screw on end of door to prevent heavy garage doors from sagging.

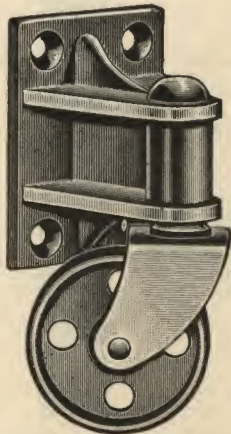

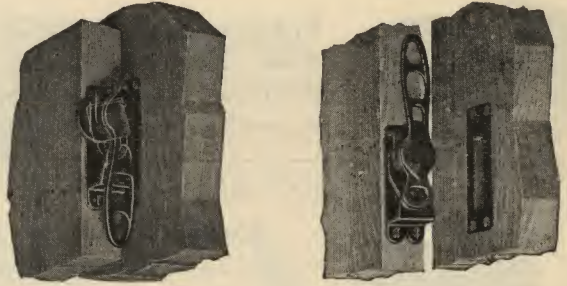

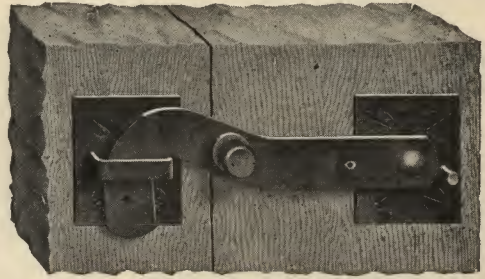

**R-W No. 416 "TITITE" DOOR LOCK**

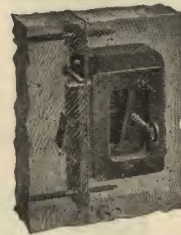

Illustration shows 416-1 bolt which is for parallel doors furnished with a flush keeper. The 416 No. 2 is intended for single or sliding doors in pairs and is furnished with a surface keeper. This lock draws the door to which it is attached firmly up against the jamb or other door depending on the conditions.

R-W No. 1025 DOOR LATCH

A simple and strong steel latch made of forged steel, $\frac{3}{8}$ " thick and 1" wide.

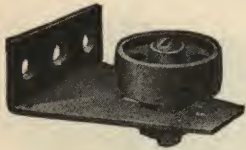

No. 1 size 6" No. 2 size 7"

Either left or right hand doors. Complete with screws for attaching to door.

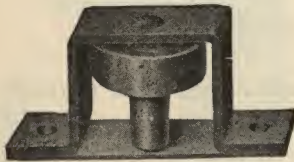

R-W No. 525 SLIDING DOOR LOCK

Made of steel and malleable iron, for sliding doors $1\frac{3}{4}$ " thick or thicker. Mortise case $4\frac{3}{4}$ " high by $3\frac{3}{4}$ " wide x $\frac{7}{8}$ " thick.

Finish regular rustless dead black.

BARN DOOR STAY ROLLER No. 53

For doors from 1½" to 2½" thick. Two stays in one as illustrated. Adjustable and reversible. Japanned finish.

BARN DOOR STAY ROLLER No. 54

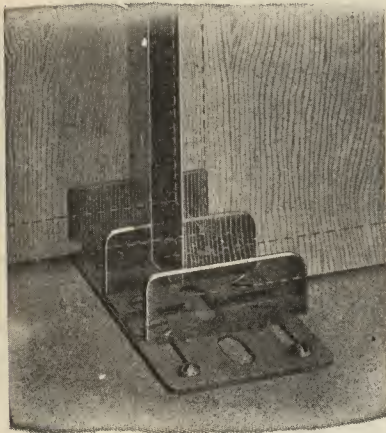

Commonly used on inside sliding doors, where stay roller can be attached to floor. Size of wheel 2½" diameter. Japanned finish.

BARN DOOR STAY ROLLER No. 55

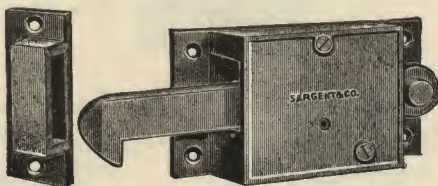

For inside doors, wheel 2" diameter. Lag screw 7/16" by 6" long. Japanned finish.

BARN DOOR STAY ROLLER No. 57

For inside doors only, wheels 2" diameter. Lag screw 7/16" diam., diameter 8" long. Japanned finish.

ADJUSTABLE PARALLEL DOOR FLOOR GUIDE No. 172

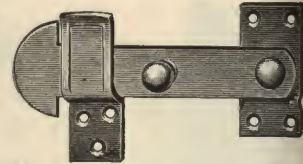

Suitable for use with concrete or wood floors. When used with concrete floors, base should be set into the concrete about ¾" thick. Adjustable for doors 1¾" to 3" thick. Black enamel finish.

HORIZONTAL RIM SLIDING DOOR LOCKS No. 6901

Operated from the outside by key, but from the inside by lifting the bolt with the hand. Reversible, for doors up to 2¼" thick.

COMBINATION LATCH & CATCH No. 1120

For use on rolling or swinging doors, reversible for either left or right hand. Size of bar 6¾"x1⅞". Japanned.

**FLOOR CENTRE STOP No. 171**

Floor stop for use with pairs of sliding doors. Can be fastened to floor or imbedded in concrete. Made of grey iron, Black japan finish. Made in three sizes.

- No. 2 For doors 2" thick.
No. 2½ For doors 2½" thick.
No. 3 For doors 3" thick.

All Bull Dog roofing materials are absolutely warranted in every respect and made of the best materials obtainable. The factory guarantee stands behind every roll. Made especially for the Boston Builders' Hardware Co.

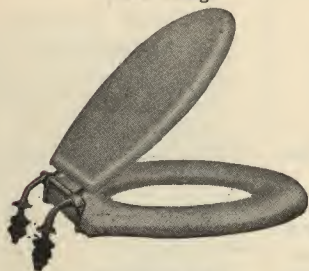

TIGER BRAND SHEATHING PAPER

Tiger Sheathing is a better quality building paper and will not disintegrate like rosin sized sheathing.

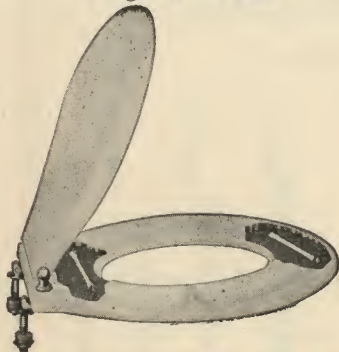

Its inner layer of asphalt insures perfect insulation. Tiger Sheathing is perfectly clean to handle; cannot smut the hands

or tools. It is light in weight, but durable; making it easy to lay under floors, clapboards, around window frames, etc. It will not break, no matter how you handle it. Every roll contains 500 sq. ft. and is 36" wide. It is absolutely waterproof and weather proof.

Samples on request.

BATH ROOM FIXTURES

Maid-En White

Our enamel line of Bath Room Fixtures is complete with all excellent values. All items are carefully made, rigidly inspected before shipping and packed in individual cartons with necessary fixtures. Fixtures are made of a special base metal covered with pure porcelain, baked under intense heat which gives each fixture a non-porous glass finish, consequently each fixture is guaranteed not to rust, chip, crack or discolor in use.

B B BOSTONS' BEST 100% QUALITY PAINTS 100% QUALITY

DESCRIPTION OF PAINTS, VARNISHES, SHELLACS, ETC.

MIXED PAINTS—Regular and starred (*) colors. 100% pure.

FLOOR PAINTS—All shades. A high grade paint to be used on all kinds of floors.

VARNISH STAIN—All shades. A high grade product of waterproof varnish, colored up to make a stain in the following shades: Light Oak, Dark Oak, Mahogany, Cherry, Walnut, Ground Color.

INTERIOR SPAR—For interior work, dries hard and has good lasting qualities.

OUTSIDE SPAR—Specially prepared for outside work, dries hard, best quality.

HARD OIL AND No. 1 COACH—For interior work, has good lasting qualities.

INTERIOR FLOOR VARNISH—Absolutely guaranteed to be one of the best varnishes made. Will dry hard, will not turn white.

BLACK SCREEN ENAMEL—Our screen enamel is a carbon black, flows freely and will not plug up the little pinholes in the screen. Waterproof.

PURE WHITE SHELLAC ; PURE ORANGE SHELLAC—Gallon lots put up in cans, two to ten gallon lots in wooden jug containers.

WHITE ENAMEL "B B"—Dries hard with a gloss. Will give satisfaction.

WHITE ENAMEL "MASTER PAINTERS"—Used by master painters where the highest grade of enamel is desired.

STATE FINISHES AND SIZES DESIRED WHEN ORDERING.

WOOD FILLER—Liquid wood filler is extensively used on new work; it makes a good under-coating for succeeding coats of varnish.

FLOOR WAX—A high grade wax that will give satisfaction.

PAINT REMOVER—A Remover that eats paint and bites varnish. Does not evaporate quickly but removes instantly. Contains no injurious substance such as carbolic acid, nitro benzene, potash, that would injure the hands when applying. Once used always preferred.

FLAT WHITE GRADE A — This is the best grade of flat white. None better.

FLAT WHITE REGULAR GRADE — Our regular flat white will give satisfaction wherever used. Makes a good under-coat for an enamel finish or a standing finish in itself.

GLOSS WHITE GRADE A—Our best grade of gloss white; guaranteed in every way; will not turn yellow and produces an enamel-like finish, flows freely, spreads easily, dries with a hard porcelain-like surface.

40-40-20 PASTE WHITE—A product preferred by a great many painters as being better than lead. Its composition consists chiefly of zinc, lithopone and titanium oxide. It hides, spreads and has long life. Ground in refined linseed oil. One gallon of paste will make two gallons of paint. "B B" Paste White once used always preferred.

FLAT MILL WHITE — Extensively used by factories and plants of every description. Gives added light to a plant and is not affected by fumes or gases and will stay white.

GLOSS OR EGG SHELL WHITE—100% Pure.

CEMENT & STUCCO PAINT—Adapted for interior or exterior use on cement or stucco houses, garages, etc.

BARN & ROOF PAINT — Especially adapted for painting fences, barns, roofs, etc.

RUBBING VARNISH—This varnish can be rubbed or polished 24 hours after application. Produces a beautiful finish and will give long wear.

B B WATERPROOF SURE-LAC

A product of quality. It is not to be confused with shellac, although their appearances are the same. SURE-LAC is waterproof; shellac is not. SURE-LAC has all the good qualities of shellac. Once tried always used.

We have also a cheaper grade of paint for \$2.00 gallon. If interested send for color cards.

THE TORBIN 10-INCH BENCH SAW

Furnished with $\frac{1}{2}$ H. P. Motor

PATENT APPLIED FOR

SPECIFICATIONS

Table Dimensions, 18"x22"
 Height overall, 18 $\frac{1}{2}$ "
 Width overall, 23"
 Length overall, 34"
 Diameter of blade, 10"
 Depth of cut, 3 $\frac{1}{4}$ "
 Speed of saw blade, 3600 R. P. M.
 Speed of motor, 1750 R. P. M.
 Size of motor, $\frac{1}{2}$ H. P.
 110/220 V. 60 Cycle A. C. Single Phase
 Shipping weight, about 235 lbs.

EQUIPMENT

Equipment: The Torbin Bench Saw, 10-inch, is equipped with 10-inch Combination Saw. Endless belt, $\frac{1}{2}$ H. P., 110-220 volt, 60 cycle A. C. Single Phase Motor. 10 ft. cord and universal plug. Can be attached anywhere. Control switch conveniently located on front of table base. Furnished with rip and cut-off fence. Cut-off fence adjustable to any angle. Bronze metal bearings. Shaft $\frac{3}{4}$ -inch, with wool packed oil well assuring positive lubrication. Table will tilt 45 degrees to the right and 20 degrees to the left, with graduated degrees on the bracket in front of table. Taper pin holds table in place when indicator is at zero. No occasion for levelling the table. The hand lever raises or lowers the saw instantly.

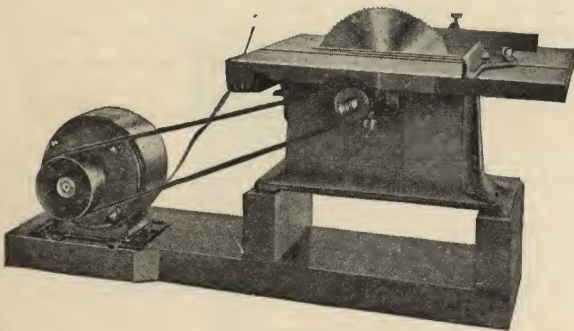

The Torbin 10" Bench Saw is designed to Rip, Cross-cut and Mitre fibrous materials up to 3 $\frac{3}{4}$ " thickness, and will do it. Will rip up to 10 $\frac{1}{2}$ " width with cutting fence attached.

Motor and saw are well balanced and mounted in one unit. A practical saw for all classes of work.

A removable throat 2" wide for dado work up to $\frac{7}{8}$ ".

A hand lever conveniently located under the table easily raises or lowers the saw for grooving.

THE SAW YOU HAVE BEEN LOOKING FOR

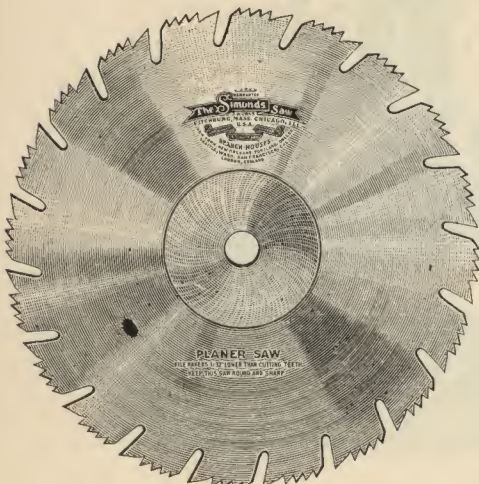

TORBIN 8-INCH BENCH SAW

Best by Test, is designed for ripping, cross cutting, and mitering stock up to 2 $\frac{1}{2}$ " thick. It can easily be mounted on a wooden stand so that it may be moved about or taken outside on jobs. It is the ideal machine tool for contractors or any one who has occasion for sawing lumber. It is so designed that it will handle small and delicate work with speed and accuracy. The table elevates for grooving and also may be tilted 10° for beveling.

Equipment 8" combination saw, endless belt, $\frac{1}{4}$ horse-power, 110 volts, 60 cycle AC Motor, with 10 ft. of cord and plug. It can be attached to any house service. It is furnished with a rip guide and cut out guide that may be adjusted at any angle. For further information write us.

CIRCULAR PLANER SAW

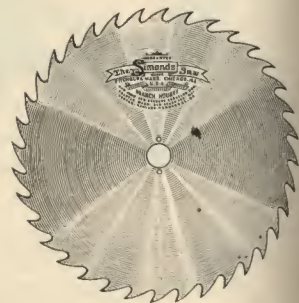

This saw cuts very smooth, almost like a Planer knife, very fast for hand-feed machines. It cuts either with or across the grain. It does not pinch, bind or burn. Made only in standard gauges with four cutting teeth and a raker to each section.

CIRCULAR SAW
GENUINE SIMONDS

WOOD TRIMMER No. 4

Improved Type

1

2 1/2 in. moulding was cut in two seconds with one stroke of the handle. For a fine job make the second light cut as shown.

2

You can cut off 1/4 in. from an oak casing 6 1/2 in. wide; can mitre 5/4 in. casing; and shave off thinnest amount desired, all or part way across the end.

3

One can mitre clapping both angles with one cut at the rate of 7 men with the old method of hand-saws.

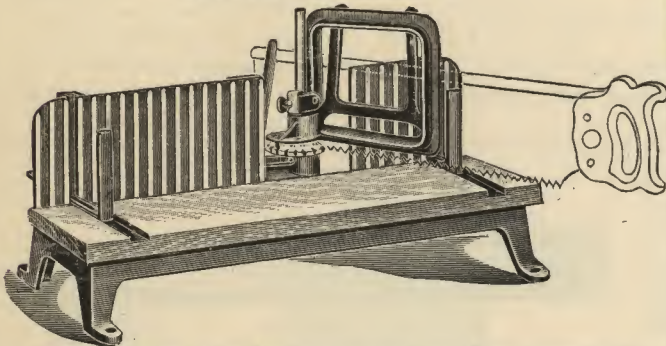

4

This shows the finished end of a clappingboard. You can mitre up to 6 in. wide, or square off more than 7 men with hand-saws.

5

A shelf 1 or 10 ft. long, any width to 10 in., can be cut round. This was done in 11 seconds. One man can square off more flooring than 7 men with hand-saws. It is a most wonderful tool for carpenters, cabinet makers, planing mill pattern makers, etc.

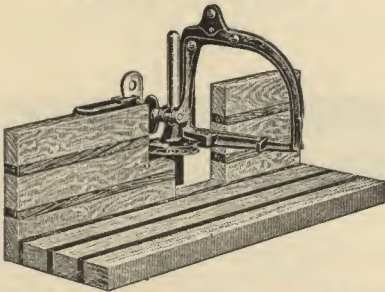

MITRE BOX No. 3

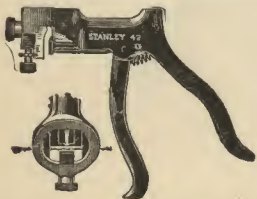

An accurate iron box mounted on four two-inch iron legs. Has hard wood bed plate which eliminates the possibility of saw teeth coming in contact with the iron base. The hard steel dial is notched and plainly marked at the angles commonly used. It is automatically locked by a hardened steel indexing lever and spring.

Prices complete without Saw.

MITRE BOX No. 2

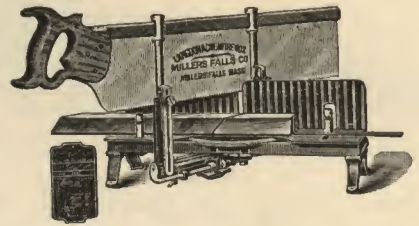

For either back or panelled Saw. May be quickly set to accurately guide the saw in a square cut or at 22½, 30, 45 degrees right or left. All setting and adjusting operations are in plain sight. Packed one in a box without saw.

Iron. Size of case $2\frac{1}{4}$ "x1 7-16", $\frac{5}{8}$ " to centre of
key hole.

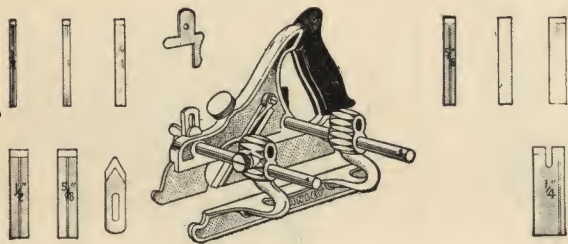

No. 161, as above. Size of case $2\frac{1}{2}$ "x2", $\frac{7}{8}$ " to
centre of key hole.

WARDROBE LOCKS No. 415 $\frac{1}{4}$

Iron. Size $2\frac{1}{2}$ "x $1\frac{1}{4}$ ", either right or left hand.

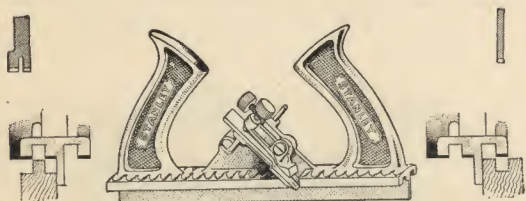

STANLEY BULL NOSE COMBINATION PLANE No. 143

For plow, matching and rabbet work. This tool has interchangeable front pieces that make it ordinary or a bull nose plane.

STANLEY DOUBLE END MATCHING PLANE

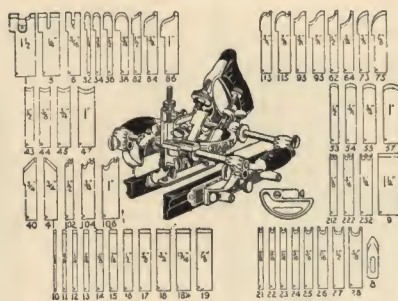

Nos. 146—147—148

These planes have two separate cutters, a plow and a tongue too, both governed by a permanent fence. Both tongue and groove are cut by working the tool in the same direction, by merely reversing it end for end.

No. 146 cuts $\frac{1}{8}$ " groove on boards $\frac{3}{8}$ " to $\frac{1}{2}$ ". Centres on $\frac{3}{8}$ "
 No. 147 cuts $\frac{3}{16}$ " groove on boards $\frac{1}{2}$ " to $\frac{3}{4}$ ". Centres on $\frac{5}{8}$ "
 No. 148 cuts $\frac{1}{4}$ " groove on boards $\frac{3}{4}$ " to 1". Centres on $\frac{7}{8}$ "

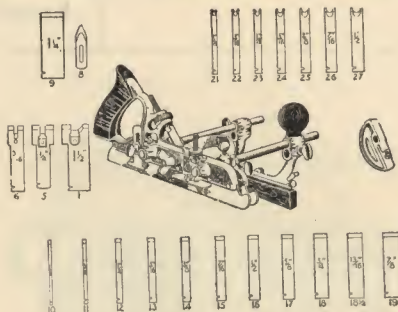

STANLEY "FIFTY-FIVE" PLANE

A planing mill within itself. A combination beading centre beading, plow, dado, rabbet filletster, match, sash, slitting plane. Also, moulding plane, and will accommodate cutters of almost any shape and size.

Furnished with 55 cutters.

STANLEY "FORTY-FIVE" PLANE

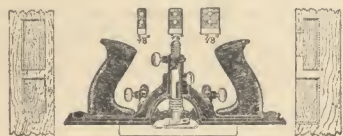

This plane covers seven planes in one, beading, centre beading, plough, dado, rabbet, filletster, match, sash and slitting plane. This plane has 23 cutters.

No. A45, same in design, but made of aluminum, is exceptionally light in weight.

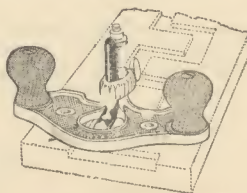

STANLEY ROUTER PLANE No. 171

With Fence

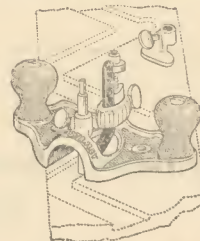

This plane will make mortises for butts, face plates, strike plates escutcheons, etc., up to a depth of $\frac{5}{16}$ " and a width of 3".

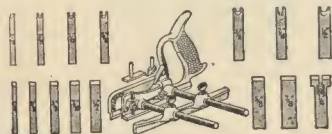

11" long, Japanned, Rosewood handles.

STANLEY ROUTER PLANES,
CLOSED THROAT No. 71½

Router plane, closed throat. Cutters are adjustable and can be held on the front of the cutter post for regular work or on the back for bull-nose work.

STANLEY ROUTER PLANES,
OPEN THROAT No. 71

Cutters are adjustable and can be held on the front of the cutter post for regular work or on the back for bull-nose work. An attachment for closing the throat, for use on narrow surfaces and regulating depth of cut is furnished.

STANLEY LIGHT COMBINATION
PLANE No. 50

A small plane for light work, adapted for plow, beading, matching and rabbet work. Fitted with spurs, depth gauge, and a fence with a 5" adjustment.

Has 15 cutters.

STANLEY CIRCULAR PLANE

No. 20

10" long, $1\frac{3}{4}$ " cutter. Japanned.

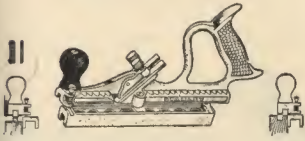

The face is fastened at each end to the body and adjusted by a screw in the centre.

STANLEY CIRCULAR PLANE
No. 113

10" long, $1\frac{3}{4}$ " cutter.

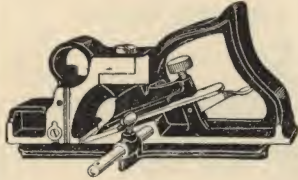

It has graduated scale for setting the face.
